NARRATIVE

hostilities, this Naval Air Base has sent twenty-four (24) PB4Y's on one mission over Truk to cover the American occupation of that Island group. This mission, of course, required even more work than normally, and as yet the CASU has not had a breathing spell. It is not known what developments will occur during the next three months, but it is expected that it will be a period of constant change and possibly a period of lighter work load.
